Forecast for Tuesday 18 Jun 2024

Weather: In the early morning it will be cloudy with the odd drizzle patch on north facing upslopes, further east there may be some fog patches in sheltered valleys. During the morning it will turn steadily drier and brighter with some sunnier spells at times through the day. It will mostly stay dry but there could still be a very isolated shower, mainly in the east. Any showers dying out by the evening.

Chance of cloud-free hill tops above 600m: 80% in the morning rising to >95% by the afternoon.

Low cloud and visibility: Some patchy cloud around 500-600m at first in the morning. However, bases soon lifting largely above summits. Poor visibility in any mist and fog patches in the morning then generally very good visibility outside showers, with brief reductions in any showers.

Meteorologist's View

A mostly fine and dry day after the low cloud in the morning clears. Although chilly in the brisk northerly winds the sunshine will be strong with high UV levels, giving an increased risk of sunburn.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 16 Jun 2024	8.2mm	18.6mm	25.2mm

Forecast for Wednesday 19 Jun 2024

Weather: Some patchy low cloud in the east at first, but soon clearing to a mostly fine and dry day with warm sunny spells.

Maximum wind: Northeast 5-10 mph with gusts 15 mph.

Chance of cloud-free hill tops above 600m: 80% in the early morning, >95% by mid-morning.

Low cloud and visibility: Some patchy cloud around 600m at first in the morning further east. However, bases soon lifting largely above summits, then excellent visibility through the afternoon.

Temperature: **Valleys:** Plus 8 Celsius, rising to Plus 19 Celsius.
At 600m: Plus 7 Celsius rising to Plus 13 Celsius.
Freezing level: Above summits.
